**Categories:** Record Saved - Shared

Hi Steve & Patricia

As discussed at yesterday's meeting, please let me know when we can get together to make this happen.

Thanks again!

Leland

**Subject:** Rush Island Monitor Siting

Lee,

We received the SO<sub>2</sub> ambient air monitoring site proposal for the Ameren Rush Island project. Patricia Maliro will be in contact with you to coordinate times that will work for Ameren, MDNR and EPAS to evaluate siting criteria for the Weaver candidate site. We anticipate setting something up over the next 2-3 weeks. Apparently some trees will need to be removed and there is a silo that needs to be evaluated to determine if it is an obstruction. MDNR staff have previously visited the Fults and Natches sites (in early April 2015) and confirmed that these site meet the siting criteria of 40 CFR 58 Appendix E. However, we could arrange to have you visit those sites too if you feel that is necessary.

The two Labadie sites are installed and operating as Special Purpose Monitors. We can arrange to have you look at these sites too if needed, but both of these sites are located in an open field and comfortably meet the siting criteria of 40 CFR 58 Appendix E. The Labadie NE site can be viewed from Hwy 94. Let us know if you want to arrange to see the Labadie site locations.

Stephen M. Hall
